Subject: FW: Operating Plan input

Mindful of the 5-8 page limit of the entire DOP, we tried to keep our input focused only on the highest priority items. See attached draft.

=====

Harold Ball, Chief, NV & Federal Facilities Section (S82), EPA Region 9 Superfund, w) 415.972.3047, c) 415.819.9821, ball.harold@epa.gov

Harry,

Please paste this into yours and forward to Angeles.

Thanks, John

Planned Actions by State/Territory

Pacific Islands:

Ordot: The Ordot Dump is slated to be taken off the National Priorities List, following EPA's approval of the RCRA Post-Closure Plan. However, the final Plan and de-listing is complicated by the fact that the Guam Solid Waste Authority, who is slated to take over Operation and Maintenance of the landfill from the court-appointed Receiver, recently lost their General Manager and Comptroller. It is also possible that the Governor may object to the de-listing due to GovGuam's legal actions against the US pertaining to the Dump cleanup costs.

California:

Hunters Point: The Hunters Point Radiation Reassessment continues with the initial re-sampling of Parcel G, and with CA DPH's completing the scanning of areas within Parcel A which are currently developed to assure residents that the property is safe. Superfund will continue to coordinate closely with the City, community, and elected officials.

Fort Ord: Expected to complete cleanup efforts under the successful 10 year, \$100 million privatized cleanup program in support of redevelopment.

Strategic approach to State engagement and share accountability:

Pacific Islands: coordinate with Pacific Islands Office on Islands Environmental Directors meeting. Conduct regular updates with Guam EPA Administrator regarding Guam NPL sites and other issues (Agent Orange, PFAS).

Hawaii: coordinate regularly with Hawaii Superfund managers on NPL site issues

CA: conduct quarterly meetings with CA Superfund management on FF sites
